

Vital Signs (enter under the drop down for vital signs)

Temperature

Pulse

Respiration

Blood pressure

Oxygen saturation

Pain level

Blood sugar level

Head-to-Toe Assessment (enter each template for head to toe section)

General Appearance: Describe the patient's general appearance, including posture, grooming, and any signs of distress.

Skin: Assess skin color, temperature, moisture, and any lesions or abnormalities.

Head and Neck: Examine the head, eyes, ears, nose, throat, and neck for any abnormalities.

Chest and Lungs: Assess respiratory effort, breath sounds, and any signs of respiratory distress.

Heart: Evaluate heart sounds, rhythm, and any murmurs or abnormalities.

Abdomen: Inspect, auscultate, and palpate the abdomen for any abnormalities.

Extremities: Check for edema, pulses, and any musculoskeletal abnormalities.

Genitourinary (GU) System: Assess for signs of urinary retention or incontinence. If a Foley catheter is present, check placement, and signs of infection.

Gastrointestinal (GI) System: Evaluate for nausea, vomiting, changes in bowel habits, and abdominal discomfort. Note last bowel movement and presence of ostomies.

Wounds and Dressings: Identify wound locations, assess characteristics (size, appearance, exudate), evaluate dressing condition, and note any signs of infection.
